

Proofreading Tool QUANTUM COMPARE™

A versatile and user friendly document comparison system for fast and accurate review of digital files.

Quantum Compare™ is a 21 CFR part 11 compliant Unicode based inspection solution capable of detecting deviations between two digital documents in their native layout, in any language, in seconds. By extracting and comparing the Unicode, operators can feel certain the results will be 100% accurate every time.

Should the content deviate due to added, deleted, or modified copy, Quantum Compare will apply digital markers around the area for easy review.

The simple load-and-compare process for like-documents helps operators quickly analyze digital files, improve quality, save time, and avoid recalls.

Cut Your Review Time By Over 90%!

APPLICATIONS

- Directions For Use (DFU's)
- Product Information
- Packaging
- Manuals
- Labels
- Inserts
- Contracts
- Image Inspection

ADAPTABILITY

Compare unlike documents such as multi-column PDF files against approved Word documents utilizing the zoning tool. By applying zones, or controlled extraction markers, over the content in the correct reading order, allows Quantum Compare to accurately inspect documents with unique layouts and different number of pages with ease. Guarantee content correctness by inspecting digital documents at the Unicode level with Quantum Compare.

Compatible with Many Common File Formats
Compares Pages with Complex Layouts

Compare Your Documents in the Native or Legacy View.

<p>Cardiac Failure DIGITALIZATION AND DIURETICS. Hypotension VASOPRESSORS, e.g., LEVARTERENOL OR EPINEPHRIN (THERE IS EVIDENCE THAT EPINEPHRINE IS THE DRUG OF CHOICE). Use the Navigator tool to easily cycle through all differences detected. Quickly determine what the change was, whether it is present on the master or sample file, and apply comments that will be found on the final report.

Omit known differences, such as symbols, from being flagged that otherwise may overburden the operator.

Options

Pharma Compliance:

Optional user management functionality to grant/restrict access rights to the program ensuring only authorized users can perform inspections and sign-off on projects.

Digital Audit Trail:

A background system audit trail will monitor all activities carried out within Quantum Compare which ensure 100% accountability and offers printable project logs.

Scalability:

Standardize your company's inspection procedures by installing Quantum Compare on your network server and accessing from client PC's via RDP or desktop shortcut.

Document Merge:

Combine multiple documents into one portfolio within Quantum Compare and avoid multiple reports and reduce redundancies.

Medical Dictionary*:

Confirm your spelling of complex medical terminology with the medical dictionary plug-in.

Spell Check:

Reduce your review time further by performing a quick spell check of your documents within Quantum Compare.

Localization*:

Reduce the learning curve at international sites by implementing Quantum Compare in multiple languages: English, French, Italian or Spanish.

**Available for an additional charge.*
